

## Make Maths part of your child's day.

- Point out to your child the many ways in which they use maths in everyday life.
- Encourage your child to tell or show you everyday activities that involve maths – making purchases, measuring ingredients, counting out places and utensils for dinner.
- Cooking

- Play board games and do puzzles with your child that involves maths. They may focus on direction or time, logic or reasoning, sorting or estimating.
- Make up games with cards and dice
- Do maths problems with your child for fun.
- In addition to maths tools, such as a ruler and a calculator, use handy household objects such as a measuring jug and containers of various shapes and sizes when doing maths with your child.

## Play Games

- Playing number games, including board games like Snakes and Ladders, has been proven by research to increase children's understanding of relative number size as well as counting.
