Number Representations to 40 Match Up **Answers**

The matching exercise consists of two columns. The left column contains five boxes, each showing a different number of base ten blocks (tens rods and ones units). The right column contains five boxes, each showing a sailboat with a number on its sail. Lines connect the boxes to their corresponding numbers:

- 2 tens rods and 5 ones units connect to the sailboat with the number 35.
- 3 tens rods and 2 ones units connect to the sailboat with the number 32.
- 2 tens rods and 8 ones units connect to the sailboat with the number 28.
- 3 tens rods and 3 ones units connect to the sailboat with the number 33.
- 3 tens rods and 1 one unit connect to the sailboat with the number 23.

Put the numbers in order from smallest to greatest on the blank ships.

Five blank sailboats are shown in a row. Each sailboat has a circle on its sail containing a number. The numbers, from left to right, are 23, 28, 32, 33, and 35.
