

Kite Class Project (isolating).

What do you know about climate change?

Imagine you had to explain some of what 'climate change' meant to someone in your class, or Kingfisher class.

Create a leaflet, a poster, a list of facts, a PowerPoint, drawings, paintings, collage, a quiz or even an investigation to show what climate change can mean. I do not mind how you show your research.

There is a lot of information available on this subject. You may wish to focus on one area such as renewable, and non-renewable energy, or plastic pollution.

I have included some links that could help. Try asking your parents too.
