All multiples of 8 are even numbers.

All multiples of 8 are also multiples of 2 and 4

150 + 80  
Bridging boundaries

325 + 200  
Add multiples of ten and a hundred

If I know  $3 + 2 = 5$  then I know 3 hundreds + 2 hundreds = 5 hundreds

Year 3 Term 2

230 - 80  
Bridging boundaries by counting back in efficient steps

$$230 - 30 - 50 = 150$$

304 - 297  
Find the difference between two numbers

304 is 7 more than 297  
297 is 7 less than 304  
so the difference between them is 7

234 + 199

Unit fractions have a numerator of 1

If the denominator is 5 there are 5 equal parts.

If the denominator is 8 there are 8 equal parts.

Non-unit fractions have a numerator greater than 1

The numerator is 2 so two out of 3 equal parts are shaded.

When the denominators are the same, the larger the numerator, the larger the fraction.

When numerators are the same, the larger the denominator the smaller the fraction.

$$\frac{2}{3} = \frac{4}{6} = \frac{6}{9}$$

If there are 2 times as many equal parts, then there are 2 times as many shaded parts

If there are 3 times as many equal parts, then there are 3 times as many shaded parts
