Statement of intent

The governing board of Long Sutton Primary School has a duty to ensure arrangements are in place to support pupils with medical conditions. The aim of this policy is to ensure that all pupils with medical conditions, in terms of both physical and mental health, receive appropriate support to allow them to play a full and active role in school life, remain healthy, have full access to education (including school trips and PE), and achieve their academic potential.

The school believes it is important that parents of pupils with medical conditions feel confident that the school provides effective support for their children's medical conditions, and that pupils feel safe in the school environment.

Some pupils with medical conditions may be classed as disabled under the definition set out in the Equality Act 2010. The school has a duty to comply with the Act in all such cases.

In addition, some pupils with medical conditions may also have SEND and have an EHC plan collating their health, social and SEND provision. For these pupils, the school's compliance with the DfE's 'Special educational needs and disability code of practice: 0 to 25 years' and the school's Special Educational Needs and Disabilities (SEND) Policy will ensure compliance with legal duties.

To ensure that the needs of our pupils with medical conditions are fully understood and effectively supported, we consult with health and social care professionals, pupils and their parents.

1. Legal framework

This policy has due regard to all relevant legislation and guidance including, but not limited to, the following:

- Children and Families Act 2014
- Education Act 2002
- Education Act 1996 (as amended)
- Children Act 1989
- National Health Service Act 2006 (as amended)
- Equality Act 2010
- Health and Safety at Work etc. Act 1974
- Misuse of Drugs Act 1971
- Medicines Act 1968
- The School Premises (England) Regulations 2012 (as amended)
- The Special Educational Needs and Disability Regulations 2014 (as amended)
- The Human Medicines (Amendment) Regulations 2017
- The Food Information (Amendment) (England) Regulations 2019 (Natasha's Law)
- DfE (2015) 'Special educational needs and disability code of practice: 0-25 years'
- DfE (2021) 'School Admissions Code'
- DfE (2015) 'Supporting pupils at school with medical conditions'
- DfE (2022) 'First aid in schools, early years and further education'
- Department of Health (2017) 'Guidance on the use of adrenaline auto-injectors in schools'

This policy operates in conjunction with the following school policies:

- Administering Medication Policy
- Special Educational Needs and Disabilities (SEND) Policy
- Drug and Alcohol Policy
- Complaints Procedures Policy
- Equity and Diversity Policy
- Attendance Policy
- Admissions Policy

2. Roles and responsibilities

The governing board will be responsible for:

- Fulfilling its statutory duties under legislation.
- Ensuring that arrangements are in place to support pupils with medical conditions.
- Ensuring that pupils with medical conditions can access and enjoy the same opportunities as any other pupil at the school.
- Working with the LA, health professionals, commissioners and support services to ensure that pupils with medical conditions receive a full education.
- Ensuring that, following long-term or frequent absence, pupils with medical conditions are reintegrated effectively.
- Ensuring that the focus is on the needs of each pupil and what support is required to support their individual needs.

- Instilling confidence in parents and pupils in the school's ability to provide effective support.
- Ensuring that all members of staff are properly trained to provide the necessary support and are able to access information and other teaching support materials as needed.
- Ensuring that no prospective pupils are denied admission to the school because arrangements for their medical conditions have not been made.
- Ensuring that pupils' health is not put at unnecessary risk. As a result, the board holds the right to not accept a pupil into school at times where it would be detrimental to the health of that pupil or others to do so, such as where the child has an infectious disease.
- Ensuring that policies, plans, procedures and systems are properly and effectively implemented.

The headteacher will be responsible for:

- The overall implementation of this policy.
- Ensuring that this policy is effectively implemented with stakeholders.
- Ensuring that all staff are aware of this policy and understand their role in its implementation.
- Ensuring that a sufficient number of staff are trained and available to implement this policy and deliver against all Medical Plans, including in emergency situations.
- Considering recruitment needs for the specific purpose of ensuring pupils with medical conditions are properly supported.
- Having overall responsibility for the development of Medical Plans.
- Ensuring that staff are appropriately insured and aware of the insurance arrangements.
- Contacting the school nurse where a pupil with a medical condition requires support that has not yet been identified.

Parents will be responsible for:

- Notifying the school if their child has a medical condition.
- Providing the school with sufficient and up-to-date information about their child's medical needs.
- Being involved in the development and review of their child's IHP.
- Carrying out any agreed actions contained in the IHP.
- Ensuring that they, or another nominated adult, are contactable at all times.

Pupils will be responsible for:

- Being fully involved in discussions about their medical support needs, where applicable.
- Contributing to the development of their IHP, if they have one, where applicable.
- Being sensitive to the needs of pupils with medical conditions.

School staff will be responsible for:

- Providing support to pupils with medical conditions, where requested, including the administering of medicines, but are not required to do so.

- Taking into account the needs of pupils with medical conditions in their lessons when deciding whether or not to volunteer to administer medication.
- Receiving sufficient training and achieve the required level of competency before taking responsibility for supporting pupils with medical conditions.
- Knowing what to do and responding accordingly when they become aware that a pupil with a medical condition needs help.

Other healthcare professionals, including GPs and paediatricians, are responsible for:

- Notifying the school nurse when a child has been identified as having a medical condition that will require support at school.
- Providing advice on developing Medical Plans.
- Providing support in the school for children with particular conditions, e.g. asthma, diabetes and epilepsy, where required.

Providers of health services are responsible for cooperating with the school, including ensuring communication takes place, liaising with the school nurse and other healthcare professionals, and participating in local outreach training.

The LA will be responsible for:

- Commissioning school nurses for local schools.
- Promoting cooperation between relevant partners.
- Making joint commissioning arrangements for EHC provision for pupils with SEND.
- Providing support, advice, guidance, and suitable training for school staff, ensuring that Medical Plans can be effectively delivered.
- Working with the school to ensure that pupils with medical conditions can attend school full-time.

Where a pupil is away from school for 15 days or more (whether consecutively or across a school year), the LA has a duty to make alternative arrangements, as the pupil is unlikely to receive a suitable education in a mainstream school.

3. Admissions

Admissions will be managed in line with the school's Admissions Policy.

No child will be denied admission to the school or prevented from taking up a school place because arrangements for their medical condition have not been made; a child may only be refused admission if it would be detrimental to the health of the child to admit them into the school setting.

The school will not ask, or use any supplementary forms that ask, for details about a child's medical condition during the admission process.

4. Notification procedure

When the school is notified that a pupil has a medical condition that requires support in school, the Parent will inform the headteacher. Following this, the school will arrange a meeting with parents, healthcare professionals (if needed) and the pupil (where appropriate), with a view to

discussing the necessity of a medical plan, outlined in detail in the [Medical Plans](#) section of this policy.

The school will not wait for a formal diagnosis before providing support to pupils. Where a pupil's medical condition is unclear, or where there is a difference of opinion concerning what support is required, a judgement will be made by the headteacher based on all available evidence, including medical evidence and consultation with parents.

For a pupil starting at the school in a September uptake, arrangements will be put in place prior to their introduction and informed by their previous institution. Where a pupil joins the school mid-term or a new diagnosis is received, arrangements will be put in place within two weeks.

5. Staff training and support

Any staff member providing support to a pupil with medical conditions will receive suitable training. Staff will not undertake healthcare procedures or administer medication without appropriate training. Training needs will be assessed by the school through the development and review of Medical Plans, on an annual basis for all school staff, and when a new staff member arrives. Where training is needed, the trainer will confirm the proficiency of staff in performing medical procedures or providing medication.

A first-aid certificate will not constitute appropriate training for supporting pupils with medical conditions.

Through training, staff will have the requisite competency and confidence to support pupils with medical conditions and fulfil the requirements set out in Medical Plans. Staff will understand the medical conditions they are asked to support, their implications, and any preventative measures that must be taken.

Whole-school awareness training will be carried out on an annual basis for all staff, and included in the induction of new staff members.

Where needed, the school will identify suitable training opportunities that ensure all medical conditions affecting pupils in the school are fully understood, and that staff can recognise difficulties and act quickly in emergency situations.

Training will be commissioned by the school and provided by the following bodies:

- Commercial training provider
- The school nurse
- GP consultant
- The parents of pupils with medical conditions

The parents of pupils with medical conditions will be consulted for specific advice and their views are sought where necessary, but they will not be used as a sole trainer.

The governing board will provide details of further CPD opportunities for staff regarding supporting pupils with medical conditions.

Supply teachers will be:

- Provided with access to this policy.
- Informed of all relevant medical conditions of pupils in the class they are providing cover for.
- Covered under the school's insurance arrangements.

6. Self-management

Following discussion with parents, pupils who are competent to manage their own health needs and medicines will be encouraged to take responsibility for self-managing their medicines and procedures. This will be reflected in their Medical Plan.

Where possible, pupils will be allowed to carry their own medicines and relevant devices. Where it is not possible for pupils to carry their own medicines or devices, they will be held in suitable locations that can be accessed quickly and easily. If a pupil refuses to take medicine or carry out a necessary procedure, staff will not force them to do so. Instead, the procedure agreed in the pupil's medical plan will be followed. Following such an event, parents will be informed so that alternative options can be considered.

If a pupil with a controlled drug passes it to another child for use, this is an offence and appropriate disciplinary action will be taken in accordance with our Drug and Alcohol Policy.

7. Medical Plans

The school, healthcare professionals and parents agree, based on evidence, whether a medical plan will be required for a pupil, or whether it would be inappropriate or disproportionate to their level of need. If no consensus can be reached, the headteacher will make the final decision.

The school, parents and a relevant healthcare professional will work in partnership to create and review Medical Plans. Where appropriate, the pupil will also be involved in the process.

Medical Plans will include the following information:

- The medical condition, along with its triggers, symptoms, signs and treatments
- The pupil's needs, including medication (dosages, side effects and storage), other treatments, facilities, equipment, access to food and drink (where this is used to manage a condition), dietary requirements, and environmental issues
- The support needed for the pupil's educational, social and emotional needs
- The level of support needed, including in emergencies
- Whether a child can self-manage their medication
- Arrangements for obtaining written permission from parents and the headteacher for medicine to be administered by school staff or self-administered by the pupil
- Separate arrangements or procedures required during school trips and activities
- Where confidentiality issues are raised by the parents or pupil, the designated individual to be entrusted with information about the pupil's medical condition
- What to do in an emergency, including contact details and contingency arrangements

Where a pupil has an emergency healthcare plan prepared by their lead clinician, this will be used to inform the medical plan.

Medical Plans will be easily accessible to those who need to refer to them, but confidentiality will be preserved. Medical Plans will be reviewed on at least an annual basis, or when a child's medical circumstances change, whichever is sooner.

Where a pupil has an EHC plan, the medical plan will be linked to it or become part of it. Where a child has SEND but does not have a statement or EHC plan, their SEND will be mentioned in their medical plan.

Where a child is returning from a period of hospital education, alternative provision or home tuition, the school will work with the LA and education provider to ensure that their medical plan identifies the support the child will need to reintegrate.

8. Managing medicines

In accordance with the school's Administering Medication Policy, medicines will only be administered at school when it would be detrimental to a pupil's health or school attendance not to do so.

Pupils under 16 years old will not be given prescription or non-prescription medicines without their parents' written consent, except where the medicine has been prescribed to the pupil without the parents' knowledge. In such cases, the school will encourage the pupil to involve their parents, while respecting their right to confidentiality.

Non-prescription medicines may be administered in the following situations:

- When it would be detrimental to the pupil's health not to do so
- When instructed by a medical professional

No pupil under the age of 16 will be given medicine containing aspirin unless prescribed by a doctor. Pain relief medicines will not be administered without first checking when the previous dose was taken, and the maximum dosage allowed.

Parents will be informed any time medication is administered that is not agreed in an medical plan.

The school will only accept medicines that are in-date, labelled, in their original container, and contain instructions for administration, dosage and storage. The only exception to this is insulin, which must still be in-date, but is available in an insulin pen or pump, rather than its original container.

All medicines will be stored safely, either in a lock cupboard in the medical room or if needed in a medical bag in the classroom cupboard (access will depend on the age of the children and the medication e.g. Y6 child may carry their own inhaler, in a reception class the inhalers will be kept out of children's reach). The medication will be labeled with the child's name and have the medical plan stored with it. Pupils will be informed where their medicines are at all times and will be able to access them immediately, whether in school or attending a school trip or residential visit. Where relevant, pupils will be informed of who holds the key to the relevant storage facility. When medicines are no longer required, they will be returned to parents for safe disposal.

Sharps boxes will be used for the disposal of needles and other sharps.

Controlled drugs will be stored in a non-portable container and only named staff members will have access; however, these drugs can be easily accessed in an emergency. A record will be kept of the amount of controlled drugs held and any doses administered. Staff may administer a controlled drug to a pupil for whom it has been prescribed, in accordance with the prescriber's instructions.

The school will hold asthma inhalers for emergency use. The inhalers will be stored in the medical room and their use will be recorded. They will be checked termly by the Office Administrator to ensure they are in date.

Records will be kept of all medicines administered to individual pupils, stating what, how and how much medicine was administered, when, and by whom. A record of side effects presented will also be held.

9. Allergens, anaphylaxis and adrenaline auto-injectors (AAIs)

The school's Allergen and Anaphylaxis Policy is implemented consistently to ensure the safety of those with allergies.

Parents are required to provide the school with up-to-date information relating to their children's allergies, as well as the necessary action to be taken in the event of an allergic reaction, such as any medication required.

The headteacher will work with the catering company to ensure specific children's needs are catered for and that all children with allergies have food prepared separately and that this is labelled specifically for them.

Staff members receive appropriate information and support relevant to their level of responsibility, in order to assist pupils with managing their allergies.

The administration of adrenaline auto-injectors (AAIs) and the treatment of anaphylaxis will be carried out in accordance with the school's Allergen and Anaphylaxis Policy. Where a pupil has been prescribed an AAI, this will be written into their medical plan.

A Register of Adrenaline Auto-Injectors (AAIs) will be kept of all the pupils who have been prescribed an AAI to use in the event of anaphylaxis. A copy of this will be held in each classroom for easy access in the event of an allergic reaction and will be checked as part of initiating the emergency response.

Pupils who have prescribed AAI devices, and are aged seven or older, can keep their device in their possession. For pupils under the age of seven who have prescribed AAI devices, these will be stored in a suitably safe and central location; in this case, the medical room.

Designated staff members will be trained on how to administer an AAI, and the sequence of events to follow when doing so. AAIs will only be administered by these staff members.

The school will keep a spare AAI for use in the event of an emergency, which will be checked on a **monthly** basis to ensure that it remains in date, and which will be replaced before the expiry date. The spare AAI will be stored in **the medical room**, ensuring that it is protected from direct sunlight and extreme temperatures. The spare AAI will only be administered to pupils at risk of anaphylaxis and where written parental consent has been gained. Where a pupil's prescribed AAI cannot be administered correctly and without delay, the spare will be

used. Where a pupil who does not have a prescribed AAI appears to be having a severe allergic reaction, the emergency services will be contacted and advice sought as to whether administration of the spare AAI is appropriate.

Where a pupil is, or appears to be, having a severe allergic reaction, the emergency services will be contacted even if an AAI device has already been administered.

In the event that an AAI is used, the pupil's parents will be notified that an AAI has been administered and informed whether this was the pupil's or the school's device. Where any AAI's are used, the following information will be recorded on the Adrenaline Auto-Injector (AAI) Record:

- Where and when the reaction took place
- How much medication was given and by whom

For children under the age of 6, a dose of 150 micrograms of adrenaline will be used.

For children aged 6-12 years, a dose of 300 micrograms of adrenaline will be used.

.AAI's will not be reused and will be disposed of according to manufacturer's guidelines following use.

In the event of a school trip, pupils at risk of anaphylaxis will have their own AAI with them and the school will give consideration to taking the spare AAI in case of an emergency.

Further information relating to the school's policies and procedures addressing allergens and anaphylaxis can be found in the Allergen and Anaphylaxis Policy.

10. Record keeping

Written records will be kept of all medicines administered to pupils. Proper record keeping will protect both staff and pupils, and provide evidence that agreed procedures have been followed. The records will be written in the class accident book and a copy given to parents for medication kept in the classroom e.g. inhalers. Other medication taken on a short term basis e.g. antibiotics will be recorded on the register in the medical room.

11. Emergency procedures

Medical emergencies will be dealt with under the school's emergency procedures.

Where an IHP is in place, it should detail:

- What constitutes an emergency.
- What to do in an emergency.

Pupils will be informed in general terms of what to do in an emergency, e.g. telling a teacher.

If a pupil needs to be taken to hospital, a member of staff will remain with the pupil until their parents arrive. When transporting pupils with medical conditions to medical facilities, staff members will be informed of the correct postcode and address for use in navigation systems.

12. Day trips, residential visits and sporting activities

Pupils with medical conditions will be supported to participate in school trips, sporting activities and residential visits.

Prior to an activity taking place, the school will conduct a risk assessment to identify what reasonable adjustments should be taken to enable pupils with medical conditions to participate. In addition to a risk assessment, advice will be sought from pupils, parents and relevant medical professionals. The school will arrange for adjustments to be made for all pupils to participate, except where evidence from a clinician, e.g. a GP, indicates that this is not possible.

13. Unacceptable practice

The school will not:

- Assume that pupils with the same condition require the same treatment.
- Prevent pupils from easily accessing their inhalers and medication.
- Ignore the views of the pupil or their parents.
- Ignore medical evidence or opinion.
- Send pupils home frequently for reasons associated with their medical condition, or prevent them from taking part in activities at school, including lunch times, unless this is specified in their IHP.
- Send an unwell pupil to the medical room or school office alone or with an unsuitable escort.
- Penalise pupils with medical conditions for their attendance record, where the absences relate to their condition.
- Make parents feel obliged or forced to visit the school to administer medication or provide medical support, including for toilet issues. The school will ensure that no parent is made to feel that they have to give up working because the school is unable to support their child's needs.
- Create barriers to pupils participating in school life, including school trips.
- Refuse to allow pupils to eat, drink or use the toilet when they need to in order to manage their condition.

14. Liability and indemnity

The governing board will ensure that appropriate insurance is in place to cover staff providing support to pupils with medical conditions.

The school holds an insurance policy with Somerset Council covering liability relating to the administration of medication. The Public Liability cover specifically notes cover in respect of the "provision of first aid treatment by an Employee to any person". This includes school staff administering medication to pupils (such as insulin to a diabetic), providing the medication has been prescribed and the staff are suitably trained.

All staff providing such support will be provided with access to the insurance policies.

In the event of a claim alleging negligence by a member of staff, civil actions are most likely to be brought against the school, not the individual.

15. Complaints

Parents or pupils wishing to make a complaint concerning the support provided to pupils with medical conditions are required to speak to the school in the first instance. If they are not satisfied with the school's response, they may make a formal complaint via the school's complaints procedures, as outlined in the Complaints Procedures Policy. If the issue remains unresolved, the complainant has the right to make a formal complaint to the DfE.

Parents and pupils are free to take independent legal advice and bring formal proceedings if they consider they have legitimate grounds to do so.

16. Home-to-school transport

Arranging home-to-school transport for pupils with medical conditions is the responsibility of the LA. Where appropriate, the school will share relevant information to allow the LA to develop appropriate transport plans for pupils with life-threatening conditions.

17. Defibrillators

The school has a Mediana HeartOn A15 automated external defibrillator (AED). The AED will be stored by the main children's entrance door, also known as the back door, in an unlocked, alarmed cabinet.

All staff members and pupils will be made aware of the AED's location and what to do in an emergency. A risk assessment regarding the storage and use of AEDs at the school will be carried out and reviewed annually.

No training will be needed to use the AED, as voice and/or visual prompts guide the rescuer through the entire process from when the device is first switched on or opened; however, staff members will be trained in cardiopulmonary resuscitation (CPR), as this is an essential part of first-aid and AED use.

The emergency services will always be called where an AED is used or requires using.

Where possible, AEDs will be used in paediatric mode or with paediatric pads for pupils under the age of eight.

AED will be checked daily when the school is unlocked and the school will follow any maintenance plan suggested by the supplier.

18. Monitoring and review

This policy is reviewed on an annual basis by the governing board, school nurse and headteacher. Any changes to this policy will be communicated to all staff, parents and relevant stakeholders.

The next scheduled review date for this policy is December 2024.

Contacting Emergency Services

To be stored by the phone in the school office

Request an ambulance – dial 999, ask for an ambulance and be ready with the information below.

Speak clearly and slowly, and be ready to repeat information if asked.

- The telephone number: school phone number.
- Your name.
- Your location as follows: full address of school.
- The postcode: school postcode.
- The exact location of the individual within the school.
- The name of the individual and a brief description of their symptoms.
- The best entrance to use and where the crew will be met and taken to the individual.
